PRELIMINARY AMENDMENT

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original) White color particles for display media used for an information display device, in which particles including at least the white color particles of liquid powders including at least the white color particles are sealed between two substrates, at least one substrate being transparent, and, in which the particles or the liquid powders, to which an electrostatic field is applied, are made to move so as to display an image, characterized in that the improvement is composed of resins made of methylpentene or cycloolefin and titanium oxide.

2. (original) The white color particles for display media according to claim 1, wherein a white color reflectance is not less than 40%.

3. (original) The white color particles for display media according to claim 1 or 2, wherein the improvement has a heat resistance such that no fusion bond is detected after the white color particles are sprayed on a glass substrate heated at 120 °C and the heating state of the heated glass substrate is kept for 30 minutes.

4. (currently amended) An information display device characterized in that the white color particles for display media ~~set forth in one of claims 1-3~~ according to claim 1 or 2 are utilized.

5. (new) An information display device characterized in that the white color particles for display media according to claim 3 are utilized.
